MODEL RELEASES & RESEARCH — 12 stories

1 Show HN: I applied Lyapunov stability theory to detect when LLM agents spiral

Google DeepMind is funding research into the potential dangers of situations where millions of different AI agents interact with each other online. According to Rohin Shah, who directs the company's AGI safety and alignment research, the mass-market arrival of agents that can...

2 Amazon security research reportedly led to the White House's Anthropic Fable ban

According to the Wall Street Journal, the export control directive that led to Anthropic cutting off access to Fable 5 and Mythos 5 was triggered in part by cybersecurity research from Amazon and conversations between CEO Andy Jassy and the White House. According to the report,...

4 Show HN: Script to bulk delete Claude chats from the web UI

I haven't found a way to delete all chats in bulk like you can on Chatgpt. With Claude, you have to scroll to the bottom, select everything, and delete. The problem is, if you have a lot of chats, it becomes impossible. I created this script. It does it alone. I hope it helps...

6 Anthropic's safety warnings may have just backfired — the government has pulled the plug on its most powerful AI

Anthropic isn't hiding its frustration. "We disagree that the finding of a narrow potential jailbreak should be cause for recalling a commercial model deployed to hundreds of millions of people," the company wrote in a blog post.
