The Download: brain-melting heatwaves and unprecedented OpenAI restrictions

MIT Tech Review +1 source

80%

This is today's edition of The Download, our weekday newsletter that provides a daily dose of what's going on in the world of technology. Heat waves mess with your brain. Scientists are trying to figure out why. —Jessica Hamzelou It's been hot in London this week. Really hot. A...

Show HN: Smart model routing directly in Claude, Codex and Cursor

HackerNews 60% HN 162

We built a model router that plugs into coding agents (e.g. Claude Code, Codex, Cursor, etc.) and intelligently sends requests to the best model to serve them. Here's a quick demo of running it locally: <https://www.youtube.com/watch?v=isKhAyivtfM> . At Weave, we write most of our...

Show HN: Overfitted a 900KB Transformer to Compress a 100MB CSV into 7MB

HackerNews 60% HN 100

I built an experiment that uses an overfitted transformer and arithmetic coding to compress individual files. Instead of training the model to generalize, I train a 900KB transformer to memorize a single file and predict the next byte. Those predictions are fed into an...

Show HN: Hacker News on a train station-style flip board

HackerNews 50% HN 51

Although the page itself is more just fun to have made and look at (I like the flip sound), the fun part is how I made it to verify the (and I hate to say it) vibe host service I've been working on. The recent flip board back and forth's on Twitter (X) are what inspired me. The...

CONF

Show HN: Mantis, A self-hosted LLM gateway

HackerNews 50% HN 5

Hey HNers - Riz here. I got together with a few guys and we built an LLM gateway. It's designed for small teams working on early-stage products, and can be deployed to AWS using a single command (i.e. `mantis deploy`). It's self-hosted, and is designed to belong to you.

<https://github.com/mantis-llm-gateway>

CONF

Show HN: Jargo - a Golang port of Pipecat for conversational-AI apps

HackerNews 50% HN 5

A WebRTC-native, audio-first conversational-AI framework for Go. Pipecat is great, and jargo is a port of it — the architecture and many design decisions are Pipecat's. But, I prefer Golang.

CONF

Show HN: A map of every UK railway, including stations that no longer exist

HackerNews 50% HN 2

Author here (Nathan). The goal for this site was to map the entire UK rail network: not just the parts a journey planner surfaces, but heritage lines, freight-only curves, named tunnels and viaducts, and the thousands of stations that have closed and were never mapped. The...

OpenAI limits GPT-5.6 rollout after government request, says restrictions shouldn't be the norm

TechCrunch AI 50%

"We don't believe this kind of government access process should become the long-term default," says OpenAI. "It keeps the best tools from users, developers, enterprises, cyber defenders, and global partners who need them."

Why everyone from OpenAI to SpaceX is building their own chips (and turning up the heat on Nvidia)

TechCrunch AI 50%

Nvidia has dominated the AI chip market for years, but the era of total dependence might be ending. OpenAI just shared its plans to spice things up with Jalapeño, its custom inference chip built with Broadcom, joining Google, Apple, and SpaceX in a growing list of companies...
