The Atlantic created a searchable database of the music used to train AI

The Verge AI +1 source

80%

Atlantic reporter Alex Reisner recently uncovered four datasets of music being used to train AI models and made them fully searchable for the public. Two of the sets are absolutely enormous at 12 million and 9 million tracks. The other two are much smaller, but still represent a...

Show HN: We post-trained a model that pen tests instead of refusing

HackerNews 50% HN 79

Hi I have been working on persistent memory. I wanted to see whether a brain like graph-based memory system could be used and more importantly how much we could save on llm tokens. FERNme uses fuzzy edge with Hebbian co-occurrence rule to create memory tags. I think FERNme could...
