MODEL RELEASES & RESEARCH — 15 stories

1 Show HN: Smart model routing directly in Claude, Codex and Cursor

We built a model router that plugs into coding agents (e.g. Claude Code, Codex, Cursor, etc.) and intelligently sends requests to the best model to serve them. Here's a quick demo of running it locally: <https://www.youtube.com/watch?v=isKhAyivtfM> . At Weave, we write most of our...

2 Show HN: Overfitted a 900KB Transformer to Compress a 100MB CSV into 7MB

I built an experiment that uses an overfitted transformer and arithmetic coding to compress individual files. Instead of training the model to generalize, I train a 900KB transformer to memorize a single file and predict the next byte. Those predictions are fed into an...
