MODEL RELEASES & RESEARCH — 17 stories

1 Show HN: Microsoft releases Flint, a visualization language for AI agents

Data visualizations are the bridge between user and data. But building AI agents that can generate visualizations reliably can be very tricky: - simple chart specs can be reliable, but generated charts are often of low quality due to reliance on system defaults; - complex chart...

2 Show HN: Frugon - Find which LLM calls a cheaper model could handle (local, MIT)

I started leaning in on AI heavily this year, as I wanted to get more done autonomously, but then my token usage climbed dramatically to the point where my weekly quota would run out before the end of the week, sometimes a couple of days into the week. I realised I had to do...

3 Show HN: Abralo - Free, easy way to run several Claude Code agents in one window

Hi guys, I've been using Claude Code for almost everything lately. Have given one an email account so it can research business leads, draft emails, fact-check them and clear them with me before sending (works really well by the way). I also tend to have a few Claude Code agents...
