Filter 40+ AI keyword patterns — LLMs, alignment, safety, research, tooling

Dedup Title-similarity (45% threshold) merges cross-source variants

Score Authenticity = 0.5 base + 0.3 per extra source + diversity + HN score bonuses

Rank Sorted by authenticity. Below 0.25 threshold are dropped.

Authenticity Tiers

- VERIFIED 0.80 - 1.00** 3+ independent sources including media
- CONFIRMED 0.50 - 0.79** 2 sources or 1 high-quality media
- EMERGING 0.25 - 0.49** Single-source; passes AI keyword filter

Source Breakdown

Show HN: IResearch - C++ search that beat Lucene and Tantivy on their benchmark

HackerNews 50% HN 13

I previously shared a mechanism for voting on .AI sites. It was something I built just to explore what's going on in this part of the internet. I wanted more comprehensive data. So I've added AI generated structured categories and a description for each of the sites, so it's...
