Show HN: A local merge queue for parallel Claude Code agents

HackerNews

+1 source

90%

HN 26

I have been pushing up to 90 commits a day on a MacBook Air via 4-5 parallel agents. As you can imagine when all the agents try to build, test and run dev servers on an 8GB machine it is the fast lane to a force quit and restart. I also did not want to pay the CI minutes on 90...
