MODEL RELEASES & RESEARCH — 10 stories

1 Show HN: Lowfat - pluggable CLI filter that saved 91.8% of my LLM tokens

Finally made something I've always wanted, using the model we built. • SOTA omni embedding model, fully local, indexes text, PDF, image, audio, and video • Swift-native app UI + mlx-swift-transformer core. No Python. • Tested on M3 Pro 18G / M3 Ultra 512G / M4 Pro 48G. All work...

2 Show HN: Boxes.dev: ditch localhost; run Claude Code and Codex in the cloud

Hi HN, we're Nick and Drew, and we're building boxes.dev - the first cloud-only agentic dev environment (ADE) that gives every Codex and Claude Code agent its own cloud computer. We're two engineers who previously built Gem (co-founder/CTO and first hire), and we spent the last...

3 Show HN: Formally verified polygon intersection - Opus 4.8 oneshots, prev failed

To my knowledge, this is the first formally verified implementation of an intersection algorithm for polygons. The experience of working with AI agents on this project changed a lot with recent model releases, as I describe in the readme. Opus 4.8 is able to provide algorithm...

7 Claude Code costs up to \$200 a month. Goose does the same thing for free.

The artificial intelligence coding revolution comes with a catch: it's expensive. Claude Code, Anthropic's terminal-based AI agent that can write, debug, and deploy code autonomously, has captured the imagination of software developers worldwide. But its pricing is ranging...
