Show HN: Make No Mistakes - AI coding agents must prove their work

HackerNews

+1 source

90%

HN 4

I want to be very upfront: this IDE's code is 100% generated by LLMs supervised by me, I am not hiding this fact. This submission was written by a human. microide's focus is performance and privacy, I was very tired of having AI integrated on every tool (ironic, I know, having...

Infuriating Google commercial imagines the founding fathers embracing AI

The Verge AI

+1 source

80%

"Group project, but make it 1776." That's how a new commercial for Google Workspace opens. And things only get cringier from there. The clip imagines what it would be like if the founding fathers turned to Google's collaboration tools and Gemini to help them draft the...

CONF

Show HN: Peek-CLI: Let Claude Code See the Browser

HackerNews

50%

HN 8

Aletheia is an open-source attempt to explore what loop engineering looks like when reality has no test suite. It maintains an explicit view of what may be true, chooses each next search for its ability to change that view, and lets contradictory evidence reduce confidence. It...

HN 7

Hi HN, This is ProofTree, and in TLDR: it is a platform where you can chat with an AI to do math, the way you already do, with context-awareness and knows how you personally do math, connected to the fora of other live human mathematicians. So, when you are talking to an AI...

CONF

Show HN: An unmetered LLM API-\$6/month, no token tracking, no limits

HackerNews 50% HN 5

Hi HN, I was once given the advice: Don't waste expensive frontier model credits (GPT/Claude/etc.) on bulk work. Send the boring, repetitive, high-volume jobs to a smaller model, and save the expensive prompts for when you actually need frontier-level reasoning. I complained and...

CONF

Show HN: AI integrated in any terminal that's invisible until you need it

HackerNews 50% HN 4

I built an open source terminal app that transparently wraps your shell so you can have access to AI whenever you need it, while it stays completely out of your way the rest of the time. Bring your own AI agent (Claude and Codex are supported out of the box) with auto-configured...

Show HN: Tracking how much of the HN front page is AI-generated

HackerNews 50% HN 3

For the past few months, I've been sending every story that reaches the HN front page through Pangram's AI detector and noting the scores. The reason I made it is that I kept noticing posts that sounded like AI-generated to me. Sometimes the comments pointed it out, sometimes a...

Show HN: I made the Chrome Dino Game editable by your AI prompts

HackerNews 50% HN 2

In 2024 Google Labs released GenDino: a version of the Chrome Dinosaur Game that let users turn prompts into skins. GenDino is dead. The Dino Game happens to be OS, so I forked it and created Vibedino to let your prompts change the actual game. Make the dino front-flip every...

Show HN: Glyph a blockchain where the proof-of-work is neural network inference

HackerNews 50% HN 2

Bitcoin burns computation on meaningless SHA-256; I wanted the burned work to be AI inference, so the network's mining base becomes general-purpose AI hardware. There were several issues but I found a solution for each and it currently live at the GitHub repo link. Repo:...
