MODEL RELEASES & RESEARCH — 16 stories

1 Show HN: Koi.rest - watch some fish and regain your balance

Felt extra autistic today and made jev an autoregressive chatbot by classifier small token vocabularies. <https://github.com/giga-james/jevqpt> had some trouble getting it to explore enough token options so i did a small spec decoding pass to expand token vocab (jev as drafter and...

2 Show HN: JevBench, a reproducible benchmark for typed decision models

Hi HN! I built JevBench because Jev kicks ass, and the world deserves to know how the serious open source and fake lookalike projects really perform in comparison. Jev-class models return bounded choices and probabilities instead of text, and are disruptively faster and cheaper...

3 Show HN: A Claude Code skill to analyze your chess games

Hello HN, It started as an experiment: can Claude play chess properly if it uses vision instead of PGN notation? Somehow it can. The next experiment was to see whether Claude + Stockfish could explain a game. Somehow it can too. A few sessions later, I had a system that takes my...

12 The AI Hype Index: AI loves cheating

Brace yourself: It turns out AI is being optimized for cheating. OpenAI's agents hacked into Hugging Face to get the answers to a cybersecurity test. Next, they solved a prestigious math problem (or just stole from two top mathematicians' answer sheets). Anthropic's models have...
