MODEL RELEASES & RESEARCH — 21 stories

1 Show HN: I implemented a neural network in SQL

Two weeks ago I was on my babymoon in Corfu, Greece. While in transit, I was overseeing a GSoC intern submit an important feature to my array database library, Xarray-SQL. He added `to_dataset()`, which completed the roundtrip between thinking of array data in a tabular model...

2 Show HN: Low-latency local LLM runner via OpenJDK Panama FFM (Java 22)

I wanted to run AI from inside the JVM. I started out with the standard REST sidecar, ripped that out to use Project Panama (Foreign Function & Memory API) in the new JDK versions to interface directly with llama.cpp. I still wasn't happy with how that functioned, so I built...

3 Show HN: Libretto PR agents - Automatically fix failing playwright scripts

Hello all, I'm a software developer. Over the last few months more and more of my work has turned into using coding agents instead of typing the whole code myself. Usually a few claude sessions at once, sometimes codex, one per feature or per revealed bug. I ran them in a split...

4 Show HN: Ilya Sutskever's AI reading list into a learning RPG - using kimi k3

I wanted to take kimi k3 for a spin. It turned my simple one sentence prompt to this. Repo here. <https://github.com/praveer13/ilya-papers-quest> Well, I'm mindblown. Very humbling for me as a software engineer. Took couple hours for it to build this completely autonomously. And...

6 Show HN: ride-recap, teaching a LLM my taste to automate cycling highlights

TL;DR: Turn hours of raw GoPro footage + a .fit file into a 60-second highlight reel with ride telemetry burned in. Every second of the ride is scanned by gemini-3.5-flash, as is the clip ranking + curation. The whole thing costs about \$0.04 per ride and takes 10 minutes. Longer...

7 Show HN: Regularly, hand-picked daily logic and number puzzles, no ads

Hi HN. I wanted to present to you Regularly (<https://regularly.co>), a daily logic/math puzzle website I made to scratch my own itch: can we have a fun and engaging puzzle app that doesn't eventually devolve into an iap blockaded mess? For background, a few years ago I released...

8 Show HN: Knowledge graph skill for Claude/Kimi Code

Working with multiple Claude Code instances I found issues with requirements traceability, test coverage, and inter-instance communication. I was working with knowledge graphs so built a knowledge graph skill for Claude Code - every user story, use-case, feature, test-case is a...

9 Show HN: AI Buddy - Free STT and Screenshot Tool for Mac (Requires Gemini)

I created this tool because I honestly didn't want to pay a monthly subscription fee for other apps, and I also needed it to be a bit more reliable and wanted to be able to take screenshots in a particular way that's useful for working with Claude Code.

11 Patreon stops asking AI bots not to scrape — and starts blocking them

Patreon is strengthening its defenses against AI scraping by working with Cloudflare to block bots that train AI models on creators' content without permission. The move marks a shift away from relying on websites using robots.txt alone to actively block unauthorized AI training.
