Show HN: Ramasite, a Self-Contained Laravel/Filament/SQLite CMS

HackerNews 50% HN 7

I'm new here, and little nervous about posting, but here goes. I'm not a newbie. I started programming in BASIC when my dad bought home a TRS-80 Model I in 1980, when I was 16. Other than a 9-year stint as active duty military, I've spent 46 years either personally or...

Show HN: AI Purgatory – how long until AI-exposed workers are back on track

HackerNews 50% HN 3

I worked up this model as a personal project to help figure out how long AI exposed workers are worse off. As a software engineer, I imagine getting laid off and being incapable of finding new work. It Also showcases the impacts of proposed redistribution mechanisms. This model...

Show HN: Editmamei – Giving AI agents access to desktop Photoshop and GIMP

HackerNews 50% HN 2

Hi HN! I built Editmamei, a local MCP server for Adobe Photoshop and GIMP. I built it because I wanted to connect Claude to a powerful photo editor, since Claude can't generate images itself. Apparently I wasn't the only one, Adobe previewed their own local Photoshop MCP...
