MODEL RELEASES & RESEARCH — 10 stories

1 Show HN: I made a Gemma 4 Mac app that names screenshots with local AI

I made my first macOS utility app that ships with a bundled Gemma 4 model, specifically the Gemma E4B one. It made my app DMG have 5.3 GB in size, but I think it is a small size for the power that this free local model can provide. It runs fine on CPU, but can also run on Apple...

2 Show HN: Lite-Harness - Self-Hosted Cursor Agents (Use Claude Code/OpenCode)

We built this Dockerfile because we wanted a simple harness server to run our agents and get memory, durable sessions, cron scheduling, and a vault, out of the box.

HackerNews · 50% · HN 6

4 I put Google's 24/7 AI assistant Gemini Spark to work, and it's actually pretty useful

Gemini Spark helps automate everyday tasks, from inbox summaries to local event planning, but it's unclear why Google made it a separate product.

5 Coders are refusing to work without AI — and that could come back to bite them

While AI is helping coders produce code faster, it may not be producing better code, researchers warn. And that could cause problems down the road for them.
