A hacker broke into John Deere and SharkNinja with an army of AI agents

The Verge AI +1 source 80%

A hacker broke into more than 100 websites using an army of AI agents that mostly operated on their own, according to findings from the AI security firm Norforge. Though Norforge doesn't name the targets, Reuters reports that the victims included companies like John Deere,...

Mamdani says feds have abdicated on AI, urges New Yorkers to push back

TechCrunch AI 50%

Mayor Zohran Mamdani said Monday night that New Yorkers must resist the narrative that an AI takeover is inevitable and demand regulations that protect the public and put power back in their hands.

Embedded AI evaluators won’t be an easy solution, Hugging Face’s policy chief says

TechCrunch AI 50%

The idea of embedded evaluators — in which supposedly "neutral" third-party observers are placed inside AI organizations — has been popularized over the last several months, as AI labs grapple with a rash of safety incidents that have spurred concerns over the potential harms of...

AI researchers stranded Claude on a virtual desert island. It started to “play.”

MIT Tech Review 50%

What do AI agents do if you don’t tell them to do anything? The answer looks a lot like play. Researchers repeatedly stranded them alone on a virtual desert island for 30 hours in an experiment reminiscent of the movies Cast Away or Home Alone. The agents—copies of Claude Opus...

Democrats think cracking down on AI could give them an edge

The Verge AI 50%

Democrats could win back control of Congress this November, and if they do, they'll need to decide how to approach one of the country's newest and thorniest political issues: AI. Polls predict Democrats will flip at least one chamber of Congress in the midterm elections, which...
