VERI

Anthropic can’t reliably control its AI agents — it’s cutting off its internal evals from the live internet instead

TechCrunch AI +1 source 80%

The incidents involved AI agents tasked to solve problems seeking resources on the internet. In the process, they exploited software flaws, accessed databases without paying fees, used URL-shortening services to smuggle information past restrictions, and even submitted a false...

Show HN: Atticus – Hold-to-talk voice assistant for macOS that runs on Claude -p

HackerNews 60% HN 105

Hi HN! I'm Saarth. I'm in 9th grade, and I built Atticus. Atticus is a fast and cheap Mac assistant that can do tasks for you. You hold down Control-Option-Space, speak or type your task, be it complex or a simple browser search, and Atticus will get on it. The interesting part...

Show HN: Brickbrag – A multiplayer brick-building world in the browser

HackerNews 50% HN 68

This is a model that I made for a historical game. I wanted to have a 1:1 scale model of Europe, but my problem was that 100m data was too low-res while 10m LIDAR data was patchy, took hundreds of GBs to store and was full of manmade objects like mines, buildings and so on. I...

CONF

Show HN: BraiNOTES, handwritten notes on your lecture PDFs in a browser tab

HackerNews 50% HN 34

In August, I posted here about TeXbrain, a LaTeX editor that runs completely in the browser, with no need for an account or server. (I didn't excpect it to get that much feedback, bug reports and help from here!) This is the same idea for the other half of my studies, the...

Former Plaud exec raises $26M for AI app that listens to you in the background

TechCrunch AI 50%

One of the core promises of AI is that the more it knows about a person, the better it will be able to assist them with tasks and make appropriate suggestions, which, if you'll believe the tech companies, requires apps and devices to listen, watch, or record users' activity all...

AI labs are buying data from dead startups to train their models

MIT Tech Review 50%

When Keelan Miskell began winding down his crypto startup this year, he didn’t think its data was worth much: the users were anonymous, the company just a few years old. But he’s since turned the firm’s digital archives into real money. He’s netted roughly $25,000 for his code...
