Everybody wants to rule the AI world

The Verge AI

+1 source

80%

Sometimes, companies pick CEOs based on carefully laid succession plans designed to maximize investor confidence and future performance. Other times, apparently, companies pick CEOs based on a bunch of video calls while the current CEO is texting the former CEO about who the new...

Show HN: Git for AI Agents

HackerNews

50%

HN 97

Systematic testing of browser agents today is not easy: testing on real websites is flaky, rate-limited and potentially expensive (e.g. using proxies or bypassing Captcha), while static-HTML benchmarks lack state and dynamic behavior. Resurf gives your browser agent a realistic,...

Show HN: Kstack - Skill pack for monitoring/troubleshooting K8s in Claude Code

HackerNews

50%

HN 22

Hi All, Recently I've been using Claude Code a lot for debugging cluster issues and I realized I was performing similar tasks repeatedly so I decided to package them up into skills so I could call them up more easily (e.g. ``/investigate``, ``/audit-security``, ``/audit-outdated``)...

Show HN: Disputron - AI small claims court for petty disputes

HackerNews

50%

HN 8

Disputron is a small claims court for petty disputes. Two parties file, AI lawyers argue both sides, and a AI judge rules from the bench. Trials run live in a courtroom view with a live court tv guide. Anyone can watch. I built it because I wanted to build something with an LLM...
