CONF

Show HN: Parsimony – an open-source benchmark for how much code AI models add

HackerNews 50% HN 67

Existing benchmarks measure solve rate and token output/cost, but don't punish excess code, which makes a codebase harder to work with in the long term. I wanted to measure this since it matters most for long-term projects. Method: it takes the patches that benchmarks already...

Cerebras CEO pushes back on AI doomsday warnings

TechCrunch AI 50%

Cerebras CEO Andrew Feldman has a message for AI leaders spreading doomsday warnings: Maybe stop talking? At TechCrunch Disrupt, he argued that the industry's focus on AI's risks is drowning out its potential benefits.

Pluto Security raises $42M as AI gives enterprise security teams a new headache

TechCrunch AI 50%

The problem with giving everyone in a company access to AI tools is that people will use them in unexpected ways. And that fact is steadily seeding fears that companies now have new, gaping security holes in their systems or, at least, will soon.
