Apple sues OpenAI for allegedly stealing hardware secrets

The Verge AI +1 source

80%

Apple has sued OpenAI, alleging that engineers stole Apple secrets to advance the AI startup's hardware plans. In its complaint, Apple says it uncovered "a pattern of theft of Apple's trade secrets by OpenAI employees who were formerly at Apple." In addition to OpenAI, the...

Show HN: I built a web tool to see and edit what an AI thinks before it answers

HackerNews 50% HN 33

I built r3 to scratch my own itch when reviewing long design doc and planning doc from AI. The chat interface is inherently bad at tracking multiple pieces of feedback across different parts of a document, so I created a lightweight local web UI to organize the review process. I...

Show HN: Mojave Paint for macOS, edit images like it's 1999

HackerNews 50% HN 3

We all need a swiss army knife for images. A tool for really getting in there and dealing with the pixels precisely. You might be combining images into a sprite sheet, you might be matting images to squares, cutting out solid backgrounds, re-tinting graphical elements. For a...

Meta removes controversial AI feature on Instagram after backlash

TechCrunch AI 50%

"Our intent was to provide a useful creative tool and to give people control over whether their public content could be referenced in this way," the company said in a blog post. "We've heard the feedback that this feature missed the mark, so it's no longer available."

Open source AI matters more than ever, according to Hugging Face's Clem Delangue

TechCrunch AI 50%

Open source AI is booming, according to Hugging Face CEO Clem Delangue. The company has grown into something like a GitHub for AI in recent years, where AI builders can share and download open models and datasets, now used by roughly half the Fortune 500. Delangue has seen the...

Meta turns off the Instagram feature that let users make AI deepfakes of public accounts

The Verge AI 50%

Following significant backlash, Meta is turning off the feature it announced this week that let users generate AI images based on content from public Instagram accounts just by tagging them. The feature, as originally set up, meant that content from any public Instagram account...

Would you host part of an AI data center in your home?

The Verge AI 50%

A solar and home energy storage company is expanding into AI data centers, but not by building one - instead, it's offering to pay its customers to put its compute units in their homes. Sunrun is launching a pilot program for a new "distributed AI compute" program that will...
